

5 Pod EPC

5 Pod EPC

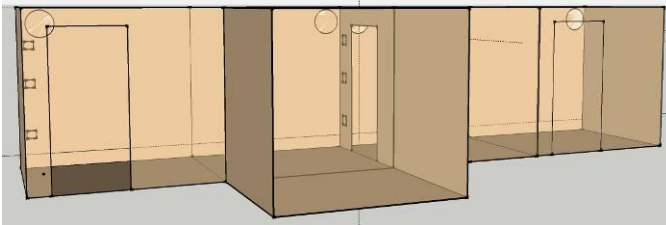

Each Pod can be delivered assembled or in a stacked configuration to save space.

The 5 Pod EPC is a highly secure, temporary space for living, working, or storage, in remote, austere and demanding environments and it can be easily assembled on location.

Each Pod is completely customizable and can be ordered with any door configuration or locking mechanisms, power outlets, network or phone connections, etc. based on the user requirements.

When fully assembled, the 5 Pod EPC back wall is 32' and the long center wall is 14'. Interior dimensions of the back wall is 31' 3" and the long side wall is 13' 3" producing over 220 sq.ft. of work or living area inside. The 5 Pod EPC can be configured with one or multiple doors depending on customer requirements.

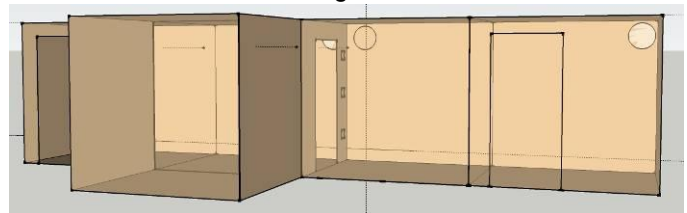

5 Pod EPC with 2 entry doors and internal wall

for interior setup, such as inside a warehouse or aircraft hangar.

Exterior and interior surfaces of the 5 Pod EPC are finished with a non-toxic, durable, fire retardant, permanent polyurethane protective surface coating (**color choices available**), which provides slip resistance as well as a barrier against mold, mildew, water, chemicals, temperature and years of use. A 5 Pod EPC can be ordered with bunk beds or

Units come pre-mounted on 4X4 skids to support movement by forklift. Units require no site preparation and are suitable for use outside in demanding tropical or temperate climates or
